

GET RID OF SEED BAGS!

"Save the labor of lifting bags."

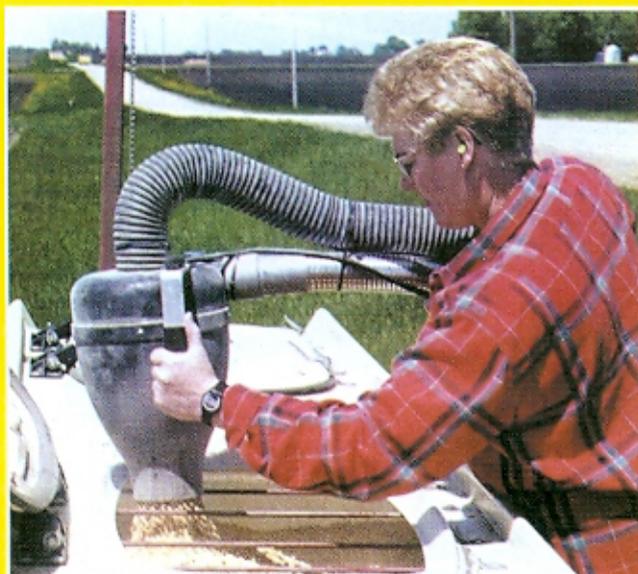

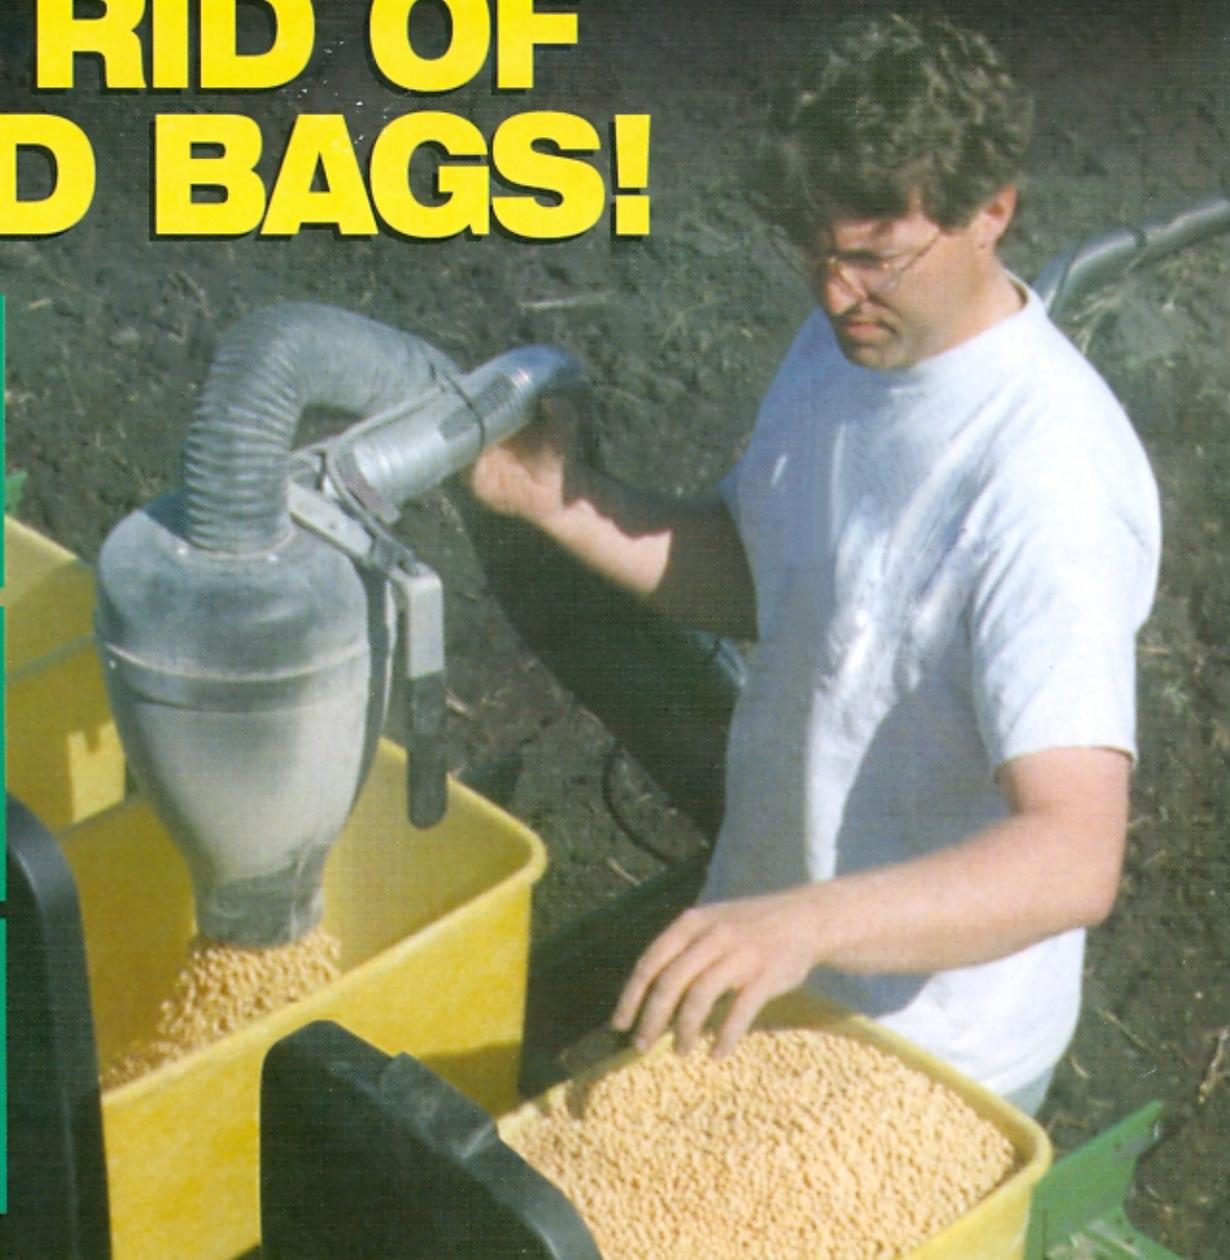

Terry Thurston
St. Johns, Michigan

"...it was so easy to handle!"

Mike Walter
Johnson Creek, Wisconsin

"It eliminated the bag handling."

David Buer
Atwater, Minnesota

"I love it! No more 5 gallon pails for me to handle!"

Jan Remus
Winthrop, Minnesota

THE EASY WAY TO FILL YOUR PLANTER

- GET RID OF SEED BAGS
- SAVE 2 HOURS PER DAY PLANTING
- PLANT 50 MORE ACRES PER DAY
- INCREASE YIELDS WITH FASTER PLANTING
- TAKE ADVANTAGE OF BULK SEED SAVINGS
- FILL A 16 ROW PLANTER IN 8 MINUTES

SEED VAC
BULK SEED CONVEYOR

"SEED VAC" TAKES THE H PLANTING SEASON... IT

"The SEED VAC means less seed handling, less labor and more acres planted per day."

Carey Remus
Winthrop, Minnesota

GET RID OF SEED BAGS

Tired of hauling those heavy, back-breaking seed bags to the

planter? The Seed Vac uses a stream of air to gently deliver bulk seed to your plater or drill. No more buckets to haul, no more seed bags to lift!

SAVE 2 HOURS PER DAY PLANTING

Save up to two hours a day with the Seed Vac. It can fill your planter at 400 lbs. per minute - that's the equivalent of eight bags! Seed Vac users report filling a 16-row planter in 8 minutes, allowing them time to plant 50 extra acres per day.

PLANT 50 MORE ACRES PER DAY

You could be planting an extra 50 acres per day! The Seed Vac eliminates clumsy bag handling and allows for easy, one-person planter filling. The unit is light, easy to handle, and can fill a 16-row planter in as little as 8 minutes.

"I bought a SEED VAC because it was made by a company with years of blower / vac experience. It had the look of good engineering."

Gene Tapalman
West Alexandria, Ohio

INCREASE YIELDS WITH FASTER PLANTING

Rain delays are costly, so every minute counts during planting season. The Seed Vac helps you

plant faster (50 or more acres per

day) and get your seed in the ground closer to the optimal planting date - substantially increasing your yields. The Seed Vac eliminates the man-handling of seed bags and saves you about 15 minutes every time you fill your planter.

"My SEED VAC worked better than augers to fill planter boxes."

Don Scholting
Springfield, Nebraska

TAKE ADVANTAGE OF BULK SEED SAVINGS

Save over \$2,500 in planting costs next spring by taking advantage of bulk seed savings! If you receive your bulk seed in the Pioneer ProBox or NK Q-Bit containers, use the special adaptor option.

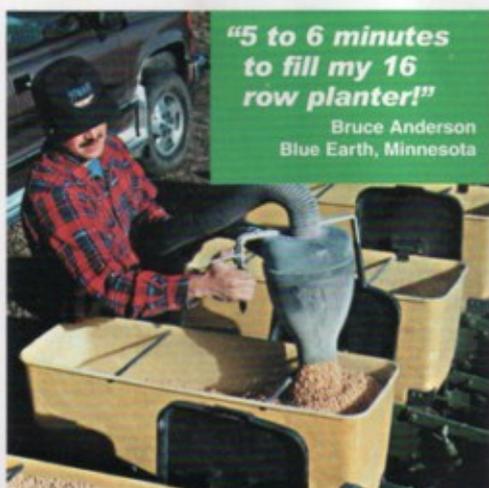

SEED VAC shown with standard features. (12-Volt, Group U1 Battery not included.)

Consult dealer or factory for available options.

TYPICAL GRAVITY WAGON SET-UP

Wagon not included

COMPACT, RELIABLE AND SIMPLE

40" HOPPER

Directs seed from the gravity wagon or truck into the airlock. Internal wiper brush helps preserve seed quality.

PRODUCT HOSE

Lightweight stainless steel delivery hose is super durable and gentle on your seed.

DELIVERY CYCLONE

Plastic cyclone weighs only 8 pounds and gently discharges seed into your planter boxes. Features a handy waterproof switch for easy on/off seed flow control.

BLOWER

Heavy-duty positive-displacement blower provides pressure air for convey seed to your planter.

GAS ENGINE

10 HP, electric-start Briggs & Stratton. Belt drives the blower and supplies current to the battery. The engine features a 2-year manufacturer's warranty.

SELF-CONTAINED POWER UNIT

The powerful blower is belt driven. The power unit is totally self-contained with a 12-Volt battery* (Group U1) and electric solenoid control. Eliminates messy hydraulics.

* Not Included.

DURABLE AIRLOCK (Patent Pending)

Heavy-duty cast iron airlock is precision machined for high performance and longer life than plastic or aluminum airlocks. Driven directly by a 12-Volt electric gearmotor.
